## PROFILE

Product Designer with 3+ years of experience designing web and mobile applications across financial technology (fintech), SaaS, e-commerce and consumer products. Led design on a 100+ page creator platform (BubbleBee) and cut a two-week WhatsApp ordering process to a four-step flow (Penchant Signature). Strong in user research, design systems and responsive design. Also ships working builds with Claude Code, taking products from Figma to deployment.

## PROFESSIONAL EXPERIENCE

**Product Designer | Freelance, Lagos (Remote) | Sep 2025 - Present**

- Independently design and build full products end-to-end, taking client and personal concepts from Figma design through to deployed, working apps using an AI-augmented workflow (Figma, Claude Code, ChatGPT).
- Own the full lifecycle across design and build: UX/UI design, prototyping and hands-on development, delivering functional web apps without a separate engineering handoff.
- Partnered with founders and small businesses across fintech, creator-economy and e-commerce niches to ship production-ready products on tight timelines.

**UI/UX Designer | Monospace Digital Solutions, Lagos | May 2024 - Jun 2025**

- Designed end-to-end digital products across SaaS, fintech and e-commerce verticals, handling full product design cycles from discovery through to developer handoff via Figma Dev Mode.
- Produced responsive, cross-platform interfaces (mobile, tablet, desktop) for multiple client brands, aligning deliverables with brand guidelines and business KPIs.
- Applied research-informed UX decisions and iterative design testing in support of user retention, sign-up and sales lead conversion goals.
- Facilitated design reviews with cross-functional teams and stakeholders, using Notion and Jira to manage design sprints and maintain structured feedback loops.

**UI/UX Designer | Tectarii, Lagos | Jun 2023 - Mar 2024**

- Designed organised, interactive interfaces for web and mobile app products, gathering requirements directly from users and stakeholders before scoping design solutions.
- Oversaw product development across design, usability and branding; ensured seamless responsive behaviour across device breakpoints.
- Created user journey maps and interaction flows that reduced friction in key user paths, improving overall satisfaction scores.

## KEY PROJECTS

**BubbleBee - Creator Platform | Product Designer (Completed)**

Led design across the full web platform of a creator-fan monetisation and community app for the Nigerian market (Feb - Jun 2026). Designed 100+ pages as high-fidelity interactive prototypes, including Explore, Wallet, Monetization Settings, Go Live studio, Upload wizards and Collaborate.

**Kree8Studios - Certified Creative Platform | Founder, Product Designer & Systems Architect (In implementation)**

Designing and building a two-sided platform that connects clients with certified creative professionals across Nigeria and wider Africa. Delivered 73 screens across 13 zones and 5 portals on one design system, with a four-level certification system, milestone-based escrow payments, and an AI tooling layer where AI recommends and a human decides. Public marketing pages are built; portal pages are in progress.

**Penchant Signature - Bespoke Bag Ordering Site | Designer & Developer, Freelance (Apr - Jun 2026)**

Designed and built a custom-order website for a Lagos leather atelier, replacing a specification process of roughly two weeks over WhatsApp with a four-step flow. In beta with four testers, specifying an order took under 10 minutes. 70+ screens, from strategy to code, solo.

**Pearl Uvo - Womenswear E-commerce | Design & Build Lead, Freelance (Jun 2026, in progress)**

Designed and built a light and dark e-commerce site for a made-to-order Lagos label that had no web presence, with Ready to Wear, Made to Order and Custom paths. 8 page templates in a four-week window.

**Multi-Industry SaaS & Fintech Products | UI/UX Designer, Monospace**
Contributed design work across a diverse portfolio of client products, including SaaS dashboards, fintech apps and e-commerce platforms.

## SKILLS & TOOLS

**Design:** Product Design, UI/UX Design, Web Applications, Mobile Applications (Android), Dashboard Design, Wireframing, Prototyping, User Flows, Information Architecture, Interaction Design, Design Systems, Visual Consistency, Typography, Responsive and Mobile-first Design, Accessibility, UX Writing

**Research:** User Research, Usability Testing, Journey Mapping, A/B Testing

**Tools:** Figma (Auto Layout, Components, Interactive Prototyping), Figma Dev Mode, Adobe Illustrator, Adobe Photoshop, Notion, Jira, Trello

**Build:** Claude Code, Vercel, GitHub, Developer Handoff

**AI-assisted workflow:** Claude (Anthropic), ChatGPT (OpenAI)

**Soft skills:** Communication Skills, Attention to Detail, Cross-functional Collaboration, Stakeholder Management, Design Reviews

## EDUCATION

National Diploma, Computer Engineering (Industrial Engineering) | Yaba College of Technology, Lagos | Sep 2015 - Jan 2019

- Graduated with honours.
